

“JUST BAYS”

MCHUTCHISON & CO.

"JUST BAYS"

Rather a peculiar title, but these Bays are JUST what you need and JUST what you should have. This booklet is published to suggest JUST what style of Bay is most suitable for YOUR purpose.

BAY TREES are being used more and more each season for formal gardening, Roof Garden and Summer decorative effects, also for Florists' signboards. What more useful or effective sign for a well kept florist establishment than a pair of compact Pyramid or Standard Bays to mark the entrance. They are imported in tubs exclusively from Belgium.

This booklet shows you at a glance the different shapes and sizes commercially grown and offered in our Special price lists for Spring or Fall direct importations from Belgium.
